1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. **Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Stump et al(5,835,371).**

-- In considering **claim 1**, the claimed subject matter that is met by Stump et al(Stump) includes:

1) the substantially planar bottom layer made of thermoplastic material is met by the substantially planar layer of thermoplastic(84, figure 10);

2) the plurality of domes made of heat resistant material and positioned upon the bottom layer and arranged in a grid is met by the plurality of domes(80) with retro-reflectors(20,20') including encapsulated micro-spheres(22,24), the domes being coated with PRIMACORE to aid in the shaping process(see: column 8, lines 50 et seq; column 9, lines 1-33);

3) the top layer extending over the domes and conforming to the domes, and extending substantially planar between the domes is met by the overcoat of transparent thermoplastic(82) as seen in figure 10(see: column 7, lines 16-41).

-- **Claim 2** recites subject matter that is met as discussed in claim 1 above, as well as:

1) the heat resistant material consisting of temperature resistant plastic is met by the domes(80) being formed of thermoplastic material, and coated with PRIMACOR(see: column 9, lines 1-27).

-- **Claims 3 and 4** recites subject matter that is met as discussed in claim 2 above, as well as:

1) the domes each having a substantially flat base surface and truncated upper surface is met as seen by the shape of the domes(80) in figures 10 and 12.
